                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 670, Application US/09107532A
Patent No. 6583275
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Lynn A Doucette-Stamm and David Bush
APPLICANT: Lynn A Doucette-Stamm and David Bush
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO
FITLE OF INVENTION: ENTEROCOCCUS FAECIUM FOR DIAGNOSTICS AND THERAPEUTICS
                                                                                              393 TACATCTCCCGGTGCTTCACGCGGAAATACACGTGAGTCCTGGCGCCAGGTCGGGGTGGG 452

Sequence 1, Application US/10105427

Publication No. US20020177192A1

GENERAL INFORMATION:

GENERAL INFORMATION:

APPLICATW: Council of Scientific and Industrial Research

TITLE OF INVENTION: Chimeric protein alpha BNAC crystallin with extraordinarily high

TITLE OF INVENTION: chaperone-like activity and a method thereof

TITLE OF INVENTION: Chaperone-like activity and a method thereof

TITLE OF INVENTION: Chaperone-like activity and a method thereof

TITLE OF INVENTION: Chaperone-like activity and a method thereof

CURRENT APPLICATION NUMBER: US/10/105,427

CURRENT APPLICATION NUMBER: US/10/105,427

NUMBER OF SEQ ID NOS: 2

SOOTWARE: PatentIn version 3.1

SEQ ID NO 1

LENGTH: 531
